

Juan Andrés Gómez Robaina

System Analyst | Software Developer

Fernández Crespo 1816 - Montevideo - Uruguay

titirinjitin@gmail.com – 099 41 56 59

Bio

Birth date: March 9, 1982

Career Journey: +20 years

@Titirinjitin

WebSite: <https://titirinjitin.com>

Brief

Enthusiastic and creative software developer, always looking for interesting problems to solve and new things to learn. A career that started in QA and grew through private and public organizations, from Uruguay to international projects.

Along the way, testing evolved into software development, with challenging environments becoming opportunities to strengthen curiosity, adaptability, teamwork and problem-solving.

Technology, creativity and storytelling often meet in the same place. AI is now adding another tool to that mix — opening new ways to build, explore ideas and approach problems, while leaving plenty of room for the human side of software development.

Still learning, still building and looking for the next interesting challenge.

Expertise Architect | Tech Lead | Coder | Web | DataBase | Consulting

Education ORT UNIVERSITY – Montevideo

2002 – 2008

Bachelor degree in System Analyst

Languages FIRST CERTIFICATE

1990 – 1999

English / B2
